CODY NOAH

Wilkesboro, NC | (336) 488-4189 | Cnoah538191@gmail.com

PROFESSIONAL SUMMARY

Driven technical specialist and cybersecurity student with a passion for optimizing systems, automating workflows, and solving complex problems. Combines 8+ years of industrial operations and hardware diagnostic experience with hands-on web development and competitive collegiate cybersecurity experience. Applies an optimization mindset to every project—identifying the "path of least resistance" by eliminating bottlenecks, standardizing safe shortcuts, and maintaining strict quality control. Relentless learner who turns iterative failures into smarter processes, seeking an entry-level IT Support, Systems Administration, or Web Development role.

TECHNICAL SKILLS & COMPETENCIES

Cybersecurity & Networking: Active Defense, Linux Administration (Self-Study), Network Fundamentals, CTF Challenges, Threat Hunting, Packet Analysis, Hardware Diagnostics

Web Development & Management: HTML5, CSS3, JavaScript, Web Maintenance, CMS Administration, Domain & Hosting Management

Hardware & Electronics: Component-Level Console Repair, Circuit Troubleshooting, Micro-Soldering, Equipment Calibration

Core Strengths: Process Optimization, Root-Cause Analysis, Quality Control & Assurance, Competitor Mindset, Technical Training & Leadership

TECHNICAL PROJECTS & INDEPENDENT SERVICES

Webmaster & Freelance Developer | Wilkes Senior Resources

Designed, built, and launched the community portal (wilkesseniorresources.org) to improve access to essential local senior services.

Oversee site optimization, content management, and ongoing maintenance to guarantee uptime and accessibility.

Webmaster & Technical Lead | Summit Gaming of Wilkes

Built and maintained summitgamingofwilkes.com (HTML, CSS, JavaScript) to host local community events and manage retail visibility.

Direct digital community outreach and manage platform uptime.

Owner & Repair Specialist | Summit Forge

Operate an independent electronics repair service specializing in gaming console diagnostics, component replacement, micro-soldering, and hardware restoration.

Manage client communications, issue scoping, and root-cause hardware repairs.

Competitions & Activities

Competitor | NCAE Cyber Games

Participated in regional collegiate cyber games, defending live virtual infrastructure against active threat scenarios while working through Capture-The-Flag (CTF) and inject challenges; actively preparing to compete again this season.

Competitor | SkillsUSA Cybersecurity Competition

Competed in hands-on state-level cybersecurity challenges focused on networking, system security configurations, and technical problem-solving.

Event Director & Community Leader | Summit Gaming

Organize and run weekly tabletop and gaming events, directing logistics, conflict resolution, and community engagement.

WORK EXPERIENCE

PARAGON FILMS – Wilkesboro, NC

Line Operator 5 | 2019 – 2025

Workflow Optimization & Efficiency: Engineered compliant, safe procedural shortcuts to streamline operations, allowing machinery to run continuously with minimal manual intervention.

Quality Assurance: Maintained rigorous quality standards under personal pride of workmanship, ensuring zero sub-standard output passed inspection.

Downtime & Scrap Reduction: Identified operational bottlenecks and implemented root-cause fixes that significantly reduced scrap waste and line downtime.

Training & Leadership: Mentored and trained incoming line operators on diagnostic troubleshooting, safety protocols, and efficient machine management.

Cross-Functional Communication: Served as primary technical liaison between operators and plant management to rapidly resolve workflow friction.

INTERFLEX – Wilkesboro, NC

Machine Operator | 2018 – 2019

Calibrated precision machinery and executed preventive maintenance to ensure high quality and zero unplanned stops.

Partnered with maintenance crews to isolate technical faults and increase overall output.

AUSTIN ELECTRICAL – Wilkesboro, NC

Welder & Metal Fabricator | 2016 – 2017

Built custom metal fabrications to exact technical specifications while resolving unexpected engineering challenges on-site.

EDUCATION

Wilkes Community College – Wilkesboro, NC

Studies in Information Technology & Cybersecurity

Relevant Coursework: Linux System Administration, Computer Networking, Cybersecurity Fundamentals
